Can I access Advantage on my Mac?

Compeat Advantage 2.0, now accessible via the web, can be accessed through any web browser and is optimized for both Safari and Chrome. Navigate to <http://portal.compeat.com> to access Compeat 2.0.

Our legacy Advantage client, however, does not support Macs. In order to run legacy Advantage on a Mac, you must first download and install a Windows Emulator/Environment. Some popular ones used by customers are VMWare Fusion and Parallel.

NOTE: Support for Compeat on Macs is limited. Any issue caused by the Windows Emulator/Environment program will require you to contact their support team directly. Compeat techs cannot diagnose or address those issues.
