### I don't have access to a feature in Advantage. How do I gain access?

Access to Advantage features is determined by the system administrators at your organization and are set in **Group Security**. Compeat cannot give access to features for specific users, even temporarily. Security group changes may be completed by your system administrator, as follows:

1. Go to **Setup > Security > Groups**.
2. Choose the group to which you are a part.

3. Under the **Screen Access** tab is a drop-down list for all the menus and features within Compeat. If the box is checked, you have access.

If you wish to have access to a feature, you will need to contact your system administrator. If they need assistance providing access, Compeat is more than happy to walk them through the process.
