I'm trying to import a Journal Entry and I'm getting an "Object Reference Not Set To an Instance of an Object" error. What do I do?

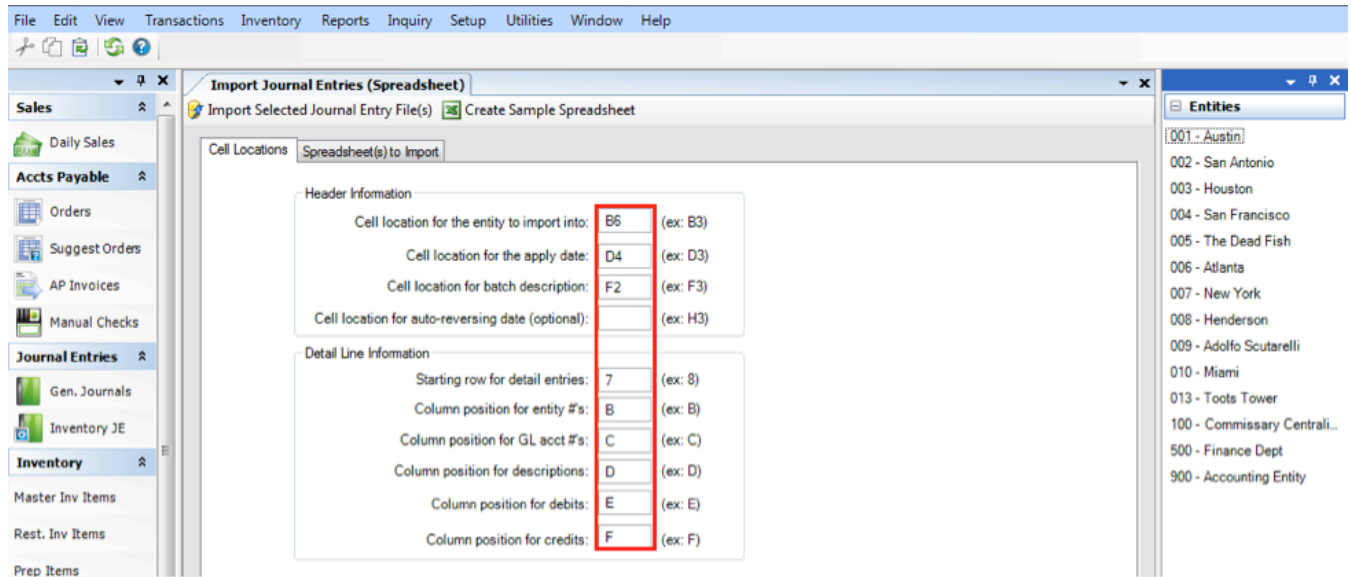

I'm trying to import a Journal Entry and I'm getting an "Object Reference Not Set To an Instance of an Object" error. What do I do?

This error is generally caused by missing data. Please check your file to ensure all fields are complete. An empty "description" on the record causes this error.

If all fields are filled, then re-check the cell locations defined on the **Import Journal Entries (Spreadsheet)** tab.

1. Go to **File > Import Data > Import Journal Entries (Spreadsheet)**.
2. Ensure the chosen definitions correspond with the fields in the file you are importing.

NOTE: The fields in your document may differ from the examples provided on this tab.
